

A History of Reliability

What do we do?

For over 25 years Kono Kogs has been providing solutions for small to multi-national companies, helping them meet their clean air compliance goals economically.

How do we do it?

We start by purchasing the most robust oxidizer systems from the industry-leading OEM's, redesign and reconfigure them to meet the desired application. We then extensively refurbish and upgrade the system, offering performance warranties & parts warranties rivaling new equipment.

Who are we?

Our management team has a combined 200+ years of oxidizer design, service, rebuild and installation experience. Challenge us... we have experience in nearly every possible oxidizer application.

What else do we do?

Equipment installation, field service, field repairs/upgrades, parts, T-Dampers, consulting and fabrication services.

KONO KOGS INC
THERMAL OXIDIZER SPECIALISTS

Thermal Oxidizer Specialists

- + Refurbished Systems
- + Oxidizer Installation
- + Oxidizer Relocation
- + Field Rebuilds
- + Field Service
- + Parts
- + Consulting
- + Oxidizer/Parts Purchases
- + Fabrication Services

KONO KOGS INC
THERMAL OXIDIZER SPECIALISTS

25+ Years Delivering Oxidizer Excellence

Regenerative Thermal Oxidizers
Recuperative Thermal Oxidizers
Catalytic Recuperative Oxidizers
VOC Rotary Concentrators

- + Over 400 refurbished oxidizers in operation around the world
- + **Performance and Parts Warranties Rivaling new equipment**
- + Nearly every industrial application
- + Management team with over 200+ years combined experience in air pollution control
- + 76,000 SF state-of-the-art refurbishing and fabrication facilities. 'Visits are always welcome and encouraged'

Fabrication Capabilities

- + Combustion Chambers
- + Media Chambers
- + Media Cold Face Support
- + Ductwork and Ductwork Installations
- + Exhaust Stacks
- + Access Platforms
- + Process T-Dampers: New/Pre-owned

Oxidizer Refurbishing

Our Beginning & Still Our Passion!

- + Component testing/replacement
- + Component upgrades
- + Ceramic media replacement
- + Cold face repair
- + Insulation repair or replacement
- + Capacity-increasing upgrades
- + PLC Upgrades
- + Remote Monitoring Retrofits
- + Repaint

Upgrades/Retrofits: hot gas bypass, recirculation, preheat/mixing boxes, particulate control, heat recovery systems

Technical Services

Minimize Downtime!

- + Field service on all OEM systems
- + **KONOCare** Preventive Maintenance Programs
- + Remote monitoring/troubleshooting
- + Extensive Parts Inventory - All OEMs
- + Oxidizer and Process Data Collection

Field Oxidizer Rebuilds

Optimize your Oxidizer's Performance!

- + Ceramic media upgrades/replacements
- + Capacity Analysis of your existing RTO
- + Insulation repair or replacement
- + PLC Upgrades/Remote Monitoring
- + Limited Process Downtime through:
 - Exceptional planning
 - Process knowledge!
- + **Emergency projects are our specialty**

THERMAL OXIDIZER SOLUTIONS FOR YOUR UNIQUE APPLICATIONS
